Inspect360 UI Kit

Portable design system extracted from Inspect360 — tokens, buttons, badges, cards, inputs, tabs. Open this file in a browser or copy the `:root` CSS into another project.

How to reuse in another project

1. Copy the entire `:root { … }` block from this file's `<style>` into your global CSS.
2. Copy the component classes you need (`.btn-*` , `.badge-*` , `.card` , `.input` , `.tabs`).
3. Fonts: load **Inter** (body) + **Poppins** (headings), or swap for your brand fonts.
4. In React/Tailwind projects, map these HSL tokens to `tailwind.config` the same way Inspect360 does in `client/src/index.css` .
5. Primary CTA pattern: use `.btn-brand` (teal gradient), not flat navy.

Brand colors

Navy = structure / text. Teal = action. Mist = soft surfaces. Status colors for feedback.

Navy
#013765

Teal (Primary)
#04C6BD

Deep Navy
#021F36

Slate
#405B70

Mist
#F2F7F8

Success
#2E8B75

Warning
#F2B84B

Critical
#D94F4F

Info
#3378B3

Buttons

Variants match `client/src/components/ui/button.tsx`. Prefer `brand` for main CTAs.

Brand CTA | Default / Primary | Secondary | Outline | Ghost | Destructive

Small | Default | Large | ★ | Disabled

Brand gradient stops: `#2DE0C5 → #04C6BD → #00A89A`

Badges

Default | Secondary | Outline | Success | Warning | Info | Critical

---

Tabs

Active tab: white surface, soft teal ring, thick teal bottom edge (Dashboard “Action Required” pattern).

Inspections (2) | Maintenance | Compliance

Cards

Report

Portfolio Report

Full portfolio export as PDF or Excel — blocks, properties, inspections.

View Report →

Static card

Radius 12px, soft navy-tinted shadow. Use `.card-hover` for lift on hover.

Form controls

Inspector name

Jane Smith

Notes

Optional notes...

Online sync enabled

Alerts

Info — informational notice with soft blue tint.

Success — action completed.

Warning — needs attention soon.

Critical — blocking error or overdue item.

Typography

Headings: Poppins semibold/bold. **Body / UI:** Inter. Deep navy text on white; muted slate for secondary copy.

Heading 1

Heading 2

Heading 3

Body text uses Operational Slate for secondary lines. Keep primary actions in teal so navy stays reserved for structure.

Radius & shadow

`--radius 8px`

`--radius-button 11px`

`--radius-card 12px`

Source of truth in repo: `client/src/index.css` (tokens), `client/src/components/ui/button.tsx`, `badge.tsx`, `card.tsx`, `input.tsx`, `tabs.tsx`. This file is a standalone extract for porting the look to other projects.
