Inspect360

Self-service pricing and billing

Build guide for the development team · Version 1.1 · 6 November 2026

> **In one line:** add a billing page where small property firms and inspectors can buy Inspect360 online with a card, with no sales call. Two tabs (Property management and AI inspections only), a Monthly and Yearly switch, an Enquire button for large customers, and prepaid top-ups for inspections and SMS.

1. What we are building

Small property management firms (under 100 properties) want Inspect360 and HeyTeam because new regulation is pushing them to upgrade. We will not sell to them through calls. They must be able to choose a plan, start a free trial and pay online without talking to us.

The billing page has four parts

1. **Two tabs.** "Property management" (the full platform) and "AI inspections only" (for people who only want fast inspection reports).
2. **A Monthly and Yearly switch.** Yearly is selected when the page opens. Yearly gives two months free.
3. **Four plan cards per tab.** Three can be bought online. The fourth (Enterprise or High volume) shows an **Enquire** button and no price.
4. **Top-ups.** Prepaid packs of inspection credits and SMS credits, on both tabs.

In the customer's billing area, Business customers can also add properties in packs of 10, and larger plans can add extra users (section 5).

Rules that matter most

- **Prices are data, not code.** Keep every price, allowance and limit in one configuration (database table or config file) so we can change prices without a release.
- **Nothing is billed after the fact.** Inspections and SMS are prepaid credits. We never send a surprise usage bill.
- **Never lose an inspection.** If a customer runs out of credits, they can still capture photos (online or offline). Only the AI write-up waits until they top up.
- **Existing customers keep their price.** Store the price version on each subscription. A price change only affects new sign-ups.
- **All prices exclude VAT.** UK VAT at 20% is added at checkout.

2. The screens

These are the four states of the page. An interactive version of the mockup is available from Nadeem. Build the page to match these layouts, colours and wording.

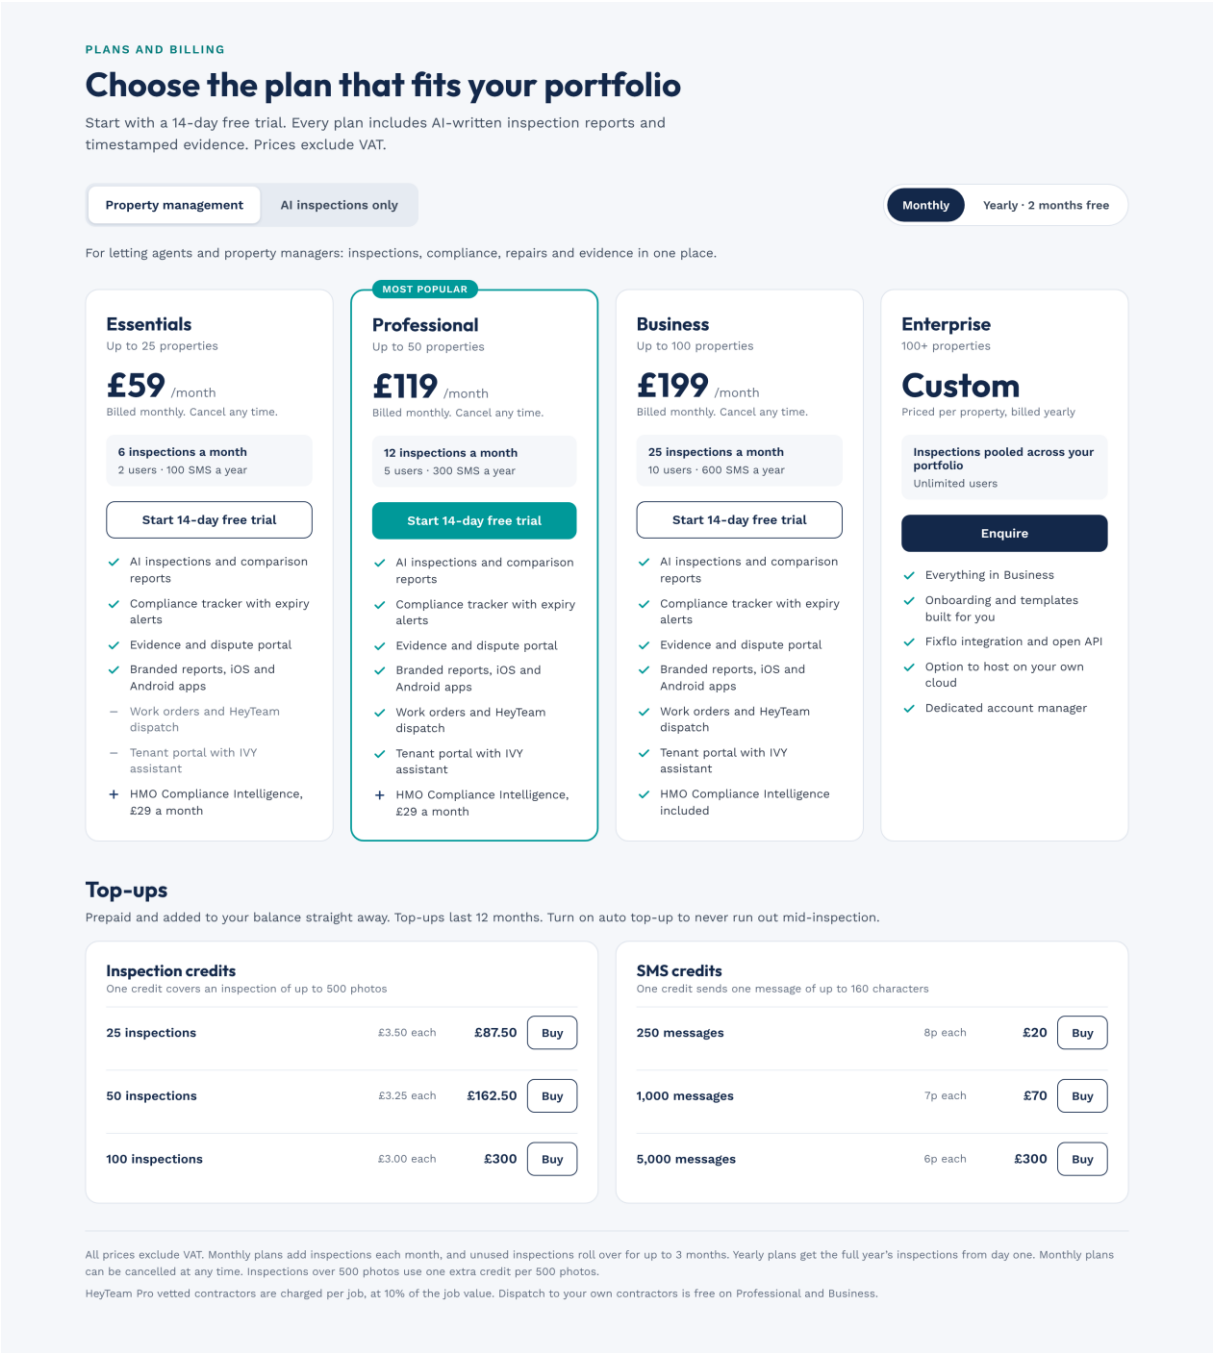

Figure 1. Property management tab, monthly prices

2. The screens (continued)

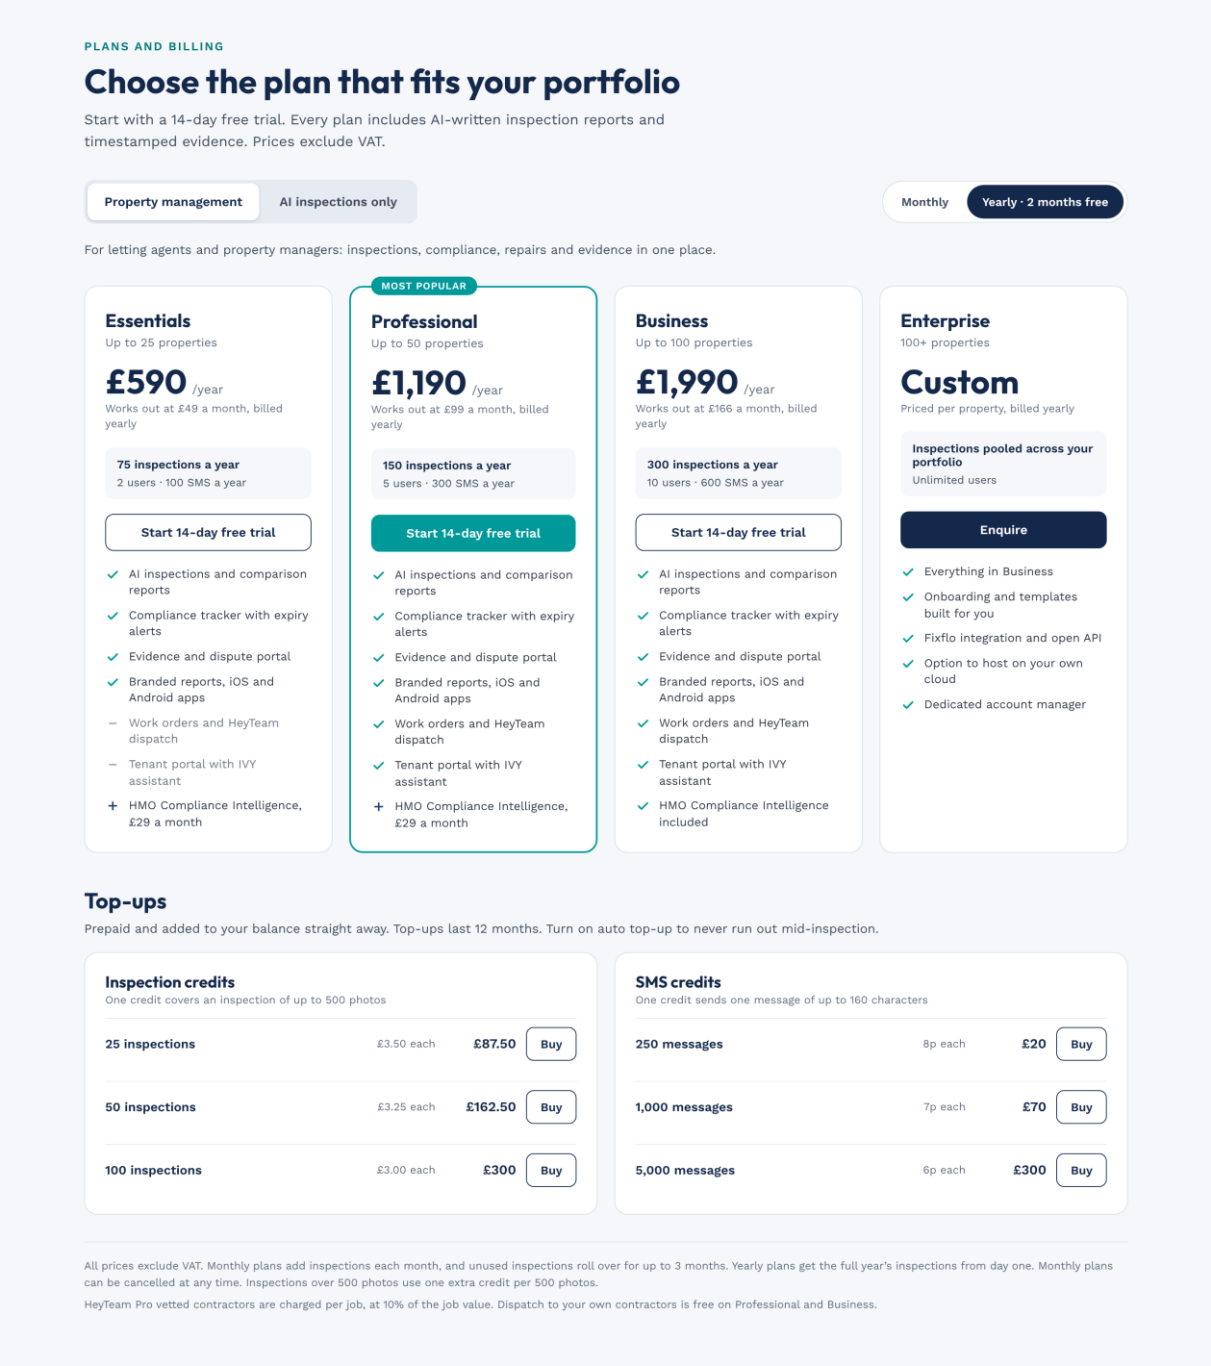

Figure 2. Property management tab, yearly prices (the default view)

2. The screens (continued)

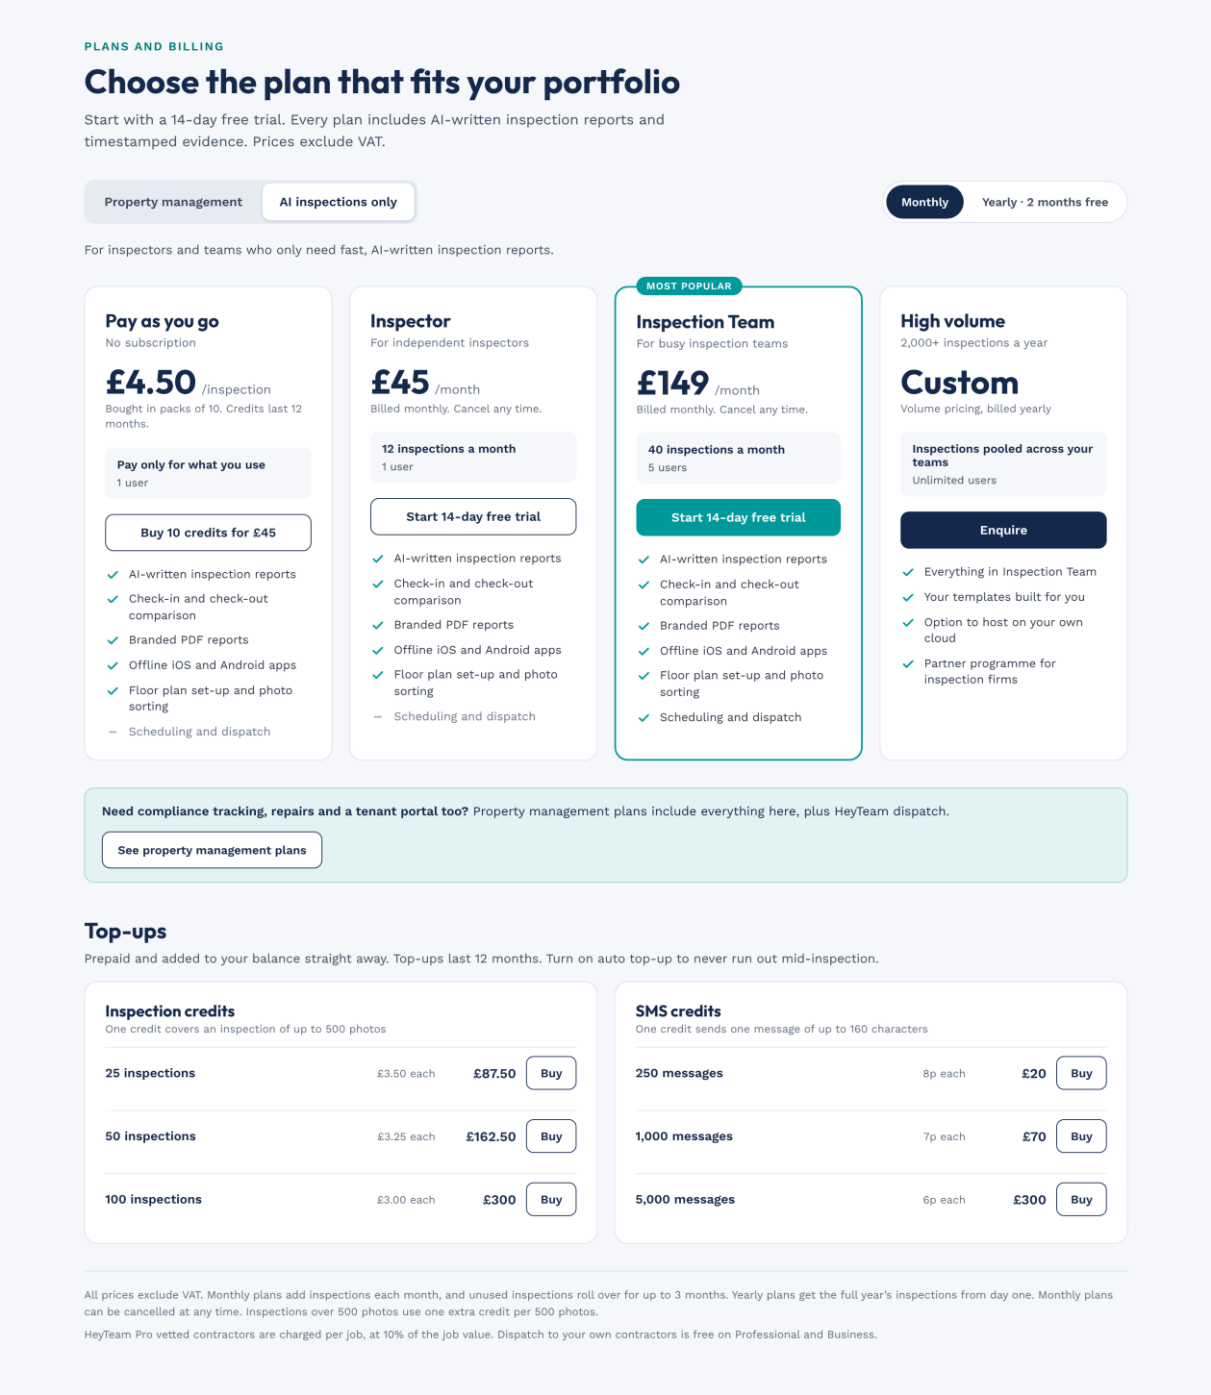

Figure 3. AI inspections only tab, monthly prices

2. The screens (continued)

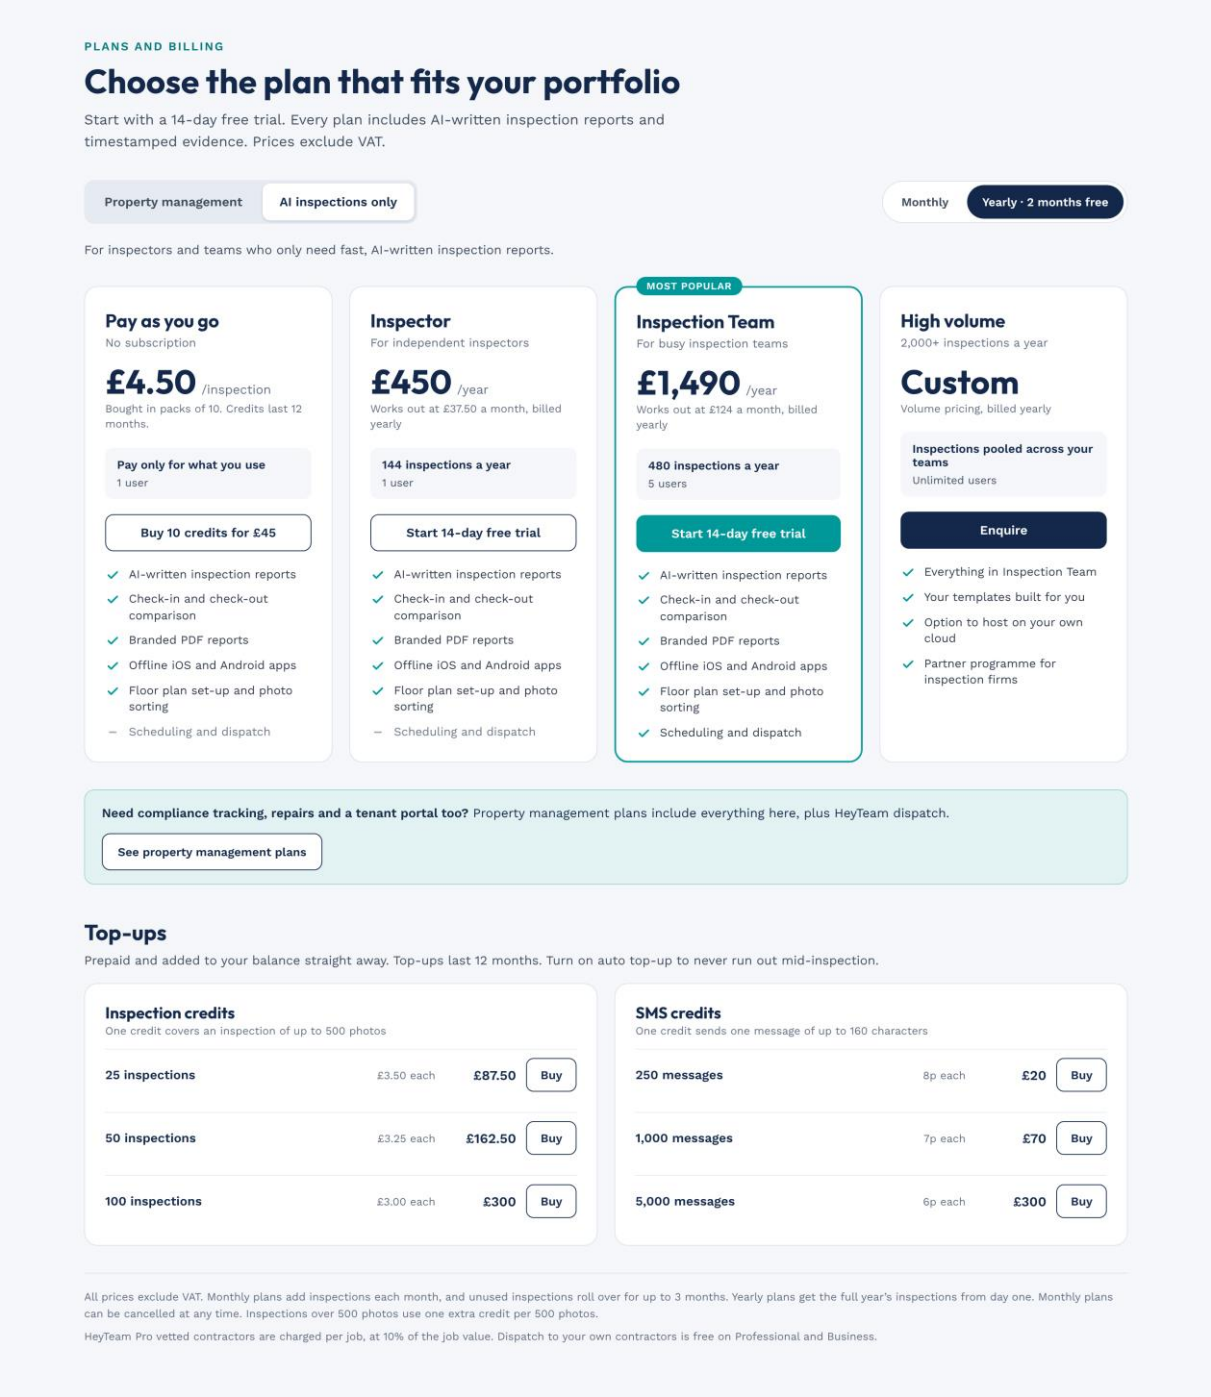

Figure 4. AI inspections only tab, yearly prices

3. The price list

All prices are in pounds and exclude VAT. "Yearly" is 10 times the monthly price (two months free).

Property management plans

Plan	Properties	Monthly	Yearly	Monthly plan gets	Yearly plan gets	Users	SMS a year
Essentials	Up to 25	£59	£590	6 a month	75 a year	2	100
Professional	Up to 50	£119	£1,190	12 a month	150 a year	5	300
Business	Up to 100	£199	£1,990	25 a month	300 a year	10	600
Enterprise	100+	Enquire	Enquire	Pooled, custom	Pooled, custom	Unlimited	Custom

AI inspections only plans

Plan	Monthly	Yearly	Inspections (monthly plan)	Inspections (yearly plan)	Users
Pay as you go	£4.50 per inspection, sold in packs of 10 (£45)	Not offered	As bought	As bought	1
Inspector	£45	£450	12 a month	144 a year	1
Inspection Team	£149	£1,490	40 a month	480 a year	5
High volume (2,000+ a year)	Enquire	Enquire	Pooled, custom	Pooled, custom	Unlimited

Add-ons

Add-on	Price	Available on
HMO Compliance Intelligence	£29 a month (£290 a year)	Essentials and Professional. Included free in Business. Not on AI inspections only plans.
HeyTeam Pro vetted contractors	10% of each job’s value, charged per job	Professional and Business. Dispatch to the customer’s own contractors is free.
10 extra properties	£25 a month (£250 a year). Adds 2 inspections a month, or 30 a year on yearly plans	Business only. Up to 15 packs (250 properties in total).
Extra user	£10 a month (£100 a year) per user	Professional, Business and Inspection Team. Not Essentials or Inspector (they upgrade instead).

Top-ups (both tabs, any plan)

Pack	Price	Price each	Lasts
25 inspection credits	£87.50	£3.50	12 months
50 inspection credits	£162.50	£3.25	12 months
100 inspection credits	£300	£3.00	12 months
250 SMS credits	£20	8p	12 months
1,000 SMS credits	£70	7p	12 months
5,000 SMS credits	£300	6p	12 months

Price floor: no self-service price may work out below **£2.95 per inspection**, our standard enterprise rate. Check this whenever prices change. The cheapest today is the 100-pack at £3.00 and Inspection Team yearly at £3.10.

4. How credits work

Credits are the heart of the billing. There are two kinds: **inspection credits** and **SMS credits**. Each customer has a balance of each, made up of separate "grants" that each have their own expiry date.

Where credits come from

Source	When it is added	When it expires
Monthly plan	On each monthly renewal date, the plan's monthly amount	3 months after it was added (this is the roll-over)
Yearly plan	On the yearly start or renewal date, the full yearly amount	At the next yearly renewal (no roll-over into the next year)
Top-up pack	As soon as payment succeeds	12 months after purchase
Free trial	At sign-up: 10 inspection credits and 20 SMS credits	When the trial ends
Admin adjustment	Added by our team (goodwill, refunds, fixes)	Set by the admin

SMS on monthly plans: add one twelfth of the yearly SMS allowance each month (Essentials 8, Professional 25, Business 50). Yearly plans get the full SMS allowance on day one.

How credits are used

1. **Spend the credit that expires soonest first.** This is fairest to the customer and keeps the rule simple.
2. **One inspection credit covers up to 500 photos.** An inspection with 501 to 1,000 photos uses 2 credits, 1,001 to 1,500 uses 3, and so on.
3. **Take the credit when the AI report is first generated**, not when photos are uploaded. Re-generating the same report does not use another credit, unless new photos take it into the next 500-photo band.
4. **If the AI run fails because of our system, give the credit back automatically.**
5. **One SMS credit covers one message of up to 160 characters.** A longer message uses one credit per 153 characters (the way SMS splits long messages). Show the credit cost before sending a bulk message.
6. **Emails and app notifications are always free.** Use them by default; SMS is for reminders the tenant must not miss.

When the balance runs low or runs out

- **Alerts:** email and in-app message when the balance falls to 20% of the plan allowance, and again at 5 credits.
- **Auto top-up (optional, off by default):** when the balance reaches 5, buy the pack the customer chose. Limit it to 3 automatic top-ups a month so a mistake cannot run up a large bill.
- **At zero inspection credits:** the inspector can still capture photos, including offline. The report waits with a clear "Top up to generate this report" message. Never delete or block captured evidence.
- **At zero SMS credits:** fall back to email automatically and tell the user.

5. Plan limits and features

Limits

- **Properties:** count active properties only (archived ones do not count). Never charge automatically for going over a limit; the customer always chooses.
- **Users:** count active users. Tenant and landlord logins never count as users.

What happens at a limit

Plan	At the property limit	At the user limit
Essentials	Block and show "Upgrade to Professional"	Block and show "Upgrade to Professional"
Professional	Block and show "Upgrade to Business"	Offer "Add a user for £10 a month" or upgrade
Business	Offer "Add 10 more properties for £25 a month"	Offer "Add a user for £10 a month"
Business at 250 properties	Show "You have outgrown self-serve. Talk to us about Enterprise" with the Enquire link	Offer "Add a user for £10 a month"
Pay as you go, Inspector	Not limited by properties	Block and show "Upgrade to Inspection Team"
Inspection Team	Not limited by properties	Offer "Add a user for £10 a month"

Extra properties and users

- **Property packs (Business only):** each pack adds 10 properties and its own inspections (2 a month on monthly plans, 30 a year on yearly plans), so customers never add properties and then run short. A customer can hold up to 15 packs, which is 250 properties in total. This 250 ceiling should be a setting, not hard-coded.
- **Extra users:** £10 a month each on Professional, Business and Inspection Team. Essentials and Inspector customers upgrade instead, because the next plan gives more for less.
- **Adding part-way through a period:** charge only for the days left (proration) and add the pack's inspections in proportion. Example: a pack added halfway through a yearly plan costs £125 and adds 15 inspections.
- **Removing:** packs and extra users come off at the next renewal. Block the removal if the customer would then be over the limit, and tell them what to archive or remove first.
- **Where to buy them:** in the billing area ("Add properties" and "Add users" buttons) and in the limit prompts above, so the customer never has to go looking.

Which features each plan switches on

Inspect360 already has on/off switches for each module per account. Set them from the plan automatically when the plan starts or changes.

Property management plans

Module	Essentials	Professional	Business
AI inspections and comparison reports	On	On	On
Branded reports, iOS and Android apps	On	On	On
Floor plan set-up and photo sorting	On	On	On
Scheduling and dispatch of inspections	On	On	On
Compliance tracker	On	On	On
Evidence and dispute portal	On	On	On
Work orders and HeyTeam dispatch	Off	On	On
Tenant portal with IVY	Off	On	On
HMO Compliance Intelligence	Add-on	Add-on	On

AI inspections only plans

Module	Pay as you go	Inspector	Inspection Team
AI inspections and comparison reports	On	On	On
Branded reports, iOS and Android apps	On	On	On
Floor plan set-up and photo sorting	On	On	On
Scheduling and dispatch of inspections	Off	Off	On
Compliance, evidence portal, work orders, tenant portal, HMO	Off	Off	Off

When a feature is off, show it greyed out with a short "Available on Professional" label and an upgrade link, rather than hiding it. This sells the upgrade.

6. Payments and subscriptions

We recommend Stripe Billing (subscriptions, Checkout, the customer billing portal and Stripe Tax for VAT). If our existing billing spec (BILL-01 to BILL-08) uses another provider, keep these rules and map them across.

Products and prices to set up

Create one product per plan with a monthly and a yearly price. Use clear lookup keys so the code never relies on raw price IDs:

Lookup key	Amount (ex VAT)	Billing
pm_essentials_month / pm_essentials_year	£59 / £590	Recurring
pm_professional_month / pm_professional_year	£119 / £1,190	Recurring
pm_business_month / pm_business_year	£199 / £1,990	Recurring
ai_inspector_month / ai_inspector_year	£45 / £450	Recurring
ai_team_month / ai_team_year	£149 / £1,490	Recurring
addon_hmo_month / addon_hmo_year	£29 / £290	Recurring add-on
addon_props10_month / addon_props10_year	£25 / £250 per pack	Recurring add-on, quantity 1 to 15
addon_user_month / addon_user_year	£10 / £100 per user	Recurring add-on, any quantity
payg_10	£45	One-off
topup_insp_25 / topup_insp_50 / topup_insp_100	£87.50 / £162.50 / £300	One-off
topup_sms_250 / topup_sms_1000 / topup_sms_5000	£20 / £70 / £300	One-off

Sign-up and free trial

1. Customer picks a plan and clicks "Start 14-day free trial".
2. They create an account and enter a card in Checkout. Nothing is charged for 14 days.
3. The trial gives the chosen plan’s features but only **10 inspection credits and 20 SMS credits**, to cap our AI cost per trial at about £10.
4. Remind them by email 3 days before the trial ends. On day 15 the first payment is taken and the plan’s full credits are added.
5. If the payment fails or they cancel during the trial, the account becomes read-only (see below).

Changing plans

- **Upgrade:** happens straight away. Charge the difference for the rest of the period (proration). Add the extra credits for the rest of the period in proportion.
- **Downgrade:** happens at the end of the current period. Block it if the customer has more properties or users than the smaller plan allows, and tell them what to remove.

- **Monthly to yearly:** happens straight away, with unused monthly time credited. Yearly to monthly: at the end of the year.
- **Switching tabs** (for example Inspector to Professional): treat as an upgrade or downgrade by price.

Payments, VAT and invoices

- Add UK VAT at 20% at checkout. Let business customers enter their VAT number and company name. Use Stripe Tax for customers outside the UK.
- Email a VAT invoice for every payment. Show past invoices in the billing area.
- Use the Stripe customer portal for card changes and cancellations.

Failed payments and cancellations

- **Failed payment:** retry automatically over 7 days with reminder emails. After that, make the account read-only.
- **Read-only means:** the customer can log in, view and export everything, but cannot generate new AI reports, send SMS or add properties.
- **Cancellation:** monthly plans end at the end of the paid month; yearly plans run to the end of the paid year. Keep a "30-day money-back on the first payment" switch in the config (on for the launch offer).
- **Never delete inspection evidence when an account is cancelled or unpaid.** Keep it under our six-year evidence retention policy.

7. Enterprise, High volume and page behaviour

Enquire buttons

- Enterprise (Property management tab) and High volume (AI inspections tab) show "Custom" and an **Enquire** button instead of a price.
- Enquire opens our demo booking page: https://calendly.com/-nadeemmohammed-/inspect360-demo. Record the click as an event so we can see demand.
- These customers are set up by our team in the admin area with custom per-property pricing and are invoiced yearly. They never go through card checkout.

Page behaviour

- Open on the **Property management** tab with **Yearly** selected.
- Put the tab and billing choice in the web address (for example ?tab=ai&billing=monthly) so marketing can link straight to a view.
- Show "Most popular" on Professional and Inspection Team only. No other badges.
- Yearly cards show the yearly price and "Works out at £X a month, billed yearly". Monthly cards show "Billed monthly. Cancel any time."
- If the visitor is logged in, replace the button on their current plan with "Current plan", and show "Upgrade" or "Change plan" on the others.
- Load prices from the configuration (or Stripe), never type them into the page.
- On a phone, cards stack in one column and the tabs and switch wrap. All buttons must be real buttons or links, at least 44 pixels tall, and usable with a keyboard.

Events to track

Tab switched, billing switch changed, plan button clicked, Enquire clicked, trial started, trial converted, top-up bought, auto top-up triggered, plan upgraded or downgraded, cancelled.

8. Suggested data model

Table	What it holds	Key fields
plans	Every plan, its limits and its modules	code, tab, max_properties, max_users, monthly_inspections, yearly_inspections, sms_per_year, modules, popular, allows_property_packs, allows_extra_users
plan_prices	Each price, with a version so old prices are kept	plan_code, cycle, amount, currency, stripe_lookup_key, version, active_from
subscriptions	Each customer's plan	account_id, plan_code, cycle, price_version, status, period_start, period_end, trial_end, addons, property_packs (0 to 15), extra_users
credit_grants	Every batch of credits added	account_id, kind (inspection or sms), source, quantity, remaining, granted_at, expires_at
credit_usage	Every credit taken	account_id, grant_id, kind, quantity, inspection_id or message_id, created_at, refunded
topup_orders	Every pack bought	account_id, pack_code, amount, payment_id, auto (yes or no), created_at

A customer's limits are the plan's limits plus their add-ons: properties = max_properties + 10 × property_packs; users = max_users + extra_users.

The customer's balance is the sum of **remaining** on grants that have not expired. Run a nightly job to expire old grants and send low-balance alerts. Listen to Stripe webhooks (payment succeeded, payment failed, subscription updated, subscription deleted) to add credits and change account status.

9. Testing checklist

1. Page opens on Property management, Yearly. Switching tabs and Monthly/Yearly changes every price and allowance correctly (Figures 1 to 4).
2. A trial gives 10 inspection credits and 20 SMS credits, and charges nothing for 14 days.
3. A monthly Professional customer gets 12 credits each month; unused credits disappear after 3 months.
4. A yearly Business customer gets 300 credits on day one, which expire at renewal.
5. An inspection with 750 photos uses 2 credits. Re-generating its report uses none.
6. A failed AI run gives the credit back.
7. At zero credits, photos can still be captured offline and uploaded; the report waits for a top-up.
8. Credits that expire soonest are always used first.
9. Auto top-up stops after 3 purchases in a month.
10. Adding property 26 on Essentials is blocked with an upgrade prompt, and no extra charge is made.
11. Downgrading with too many properties is blocked with a clear message.
12. Adding property 101 on Business offers a 10-property pack; buying it raises the limit to 110 and adds the pack's inspections.
13. A 16th property pack cannot be bought; at 250 properties the Enterprise message and Enquire link appear.
14. Extra users can be added on Professional, Business and Inspection Team, but not on Essentials or Inspector.
15. A pack added halfway through a yearly plan costs £125 and adds 15 inspections.
16. Modules switch on and off correctly for every plan, including the HMO add-on.
17. VAT is added at checkout and appears on the invoice.
18. After 7 days of failed payments the account is read-only, and all evidence can still be viewed and exported.
19. Changing a price in the configuration changes the page for new customers only; existing subscribers keep their price.
20. Enquire opens the booking page and the click is recorded.

Questions for Nadeem before launch

- Confirm the SMS cost per message on our TextMagic account, so SMS pack prices still cover it.
- Confirm the Inspector price (£45). It is cheaper than Essentials, so some agents may pick it to avoid paying for compliance.
- Confirm the 30-day money-back guarantee for the launch offer.
